

Date:

Wednesday Challenge Form

Group Members:Ian, Carlos, Amren

Problem Statement: Design a cardboard A and then take another groups design and cut it out to perfection.

Approach:We will draw out the design then use a straight edge to cut it out smoothly. i am not cutting so my group members are cutting it and they did a pretty good job. the only issue is the design isn't the easiest to create.

Solution: Make an easy design so the other group can easily create our A perfectly.
